

What is the Imjin Pkwy Widening & Roundabout Project?

The \$40.5M Project is a road safety and widening construction project along a segment of an important connector route between the Monterey Peninsula and the greater Salinas Valley.

Construction improvements include:

- Widening of Imjin Parkway by adding a lane in each direction between Imjin Road (near California Avenue) and Reservation Road;
- Replacing four (4) signalized intersections with roundabouts
- Creating pedestrian crossings at intersections for safer access to and from the surrounding neighborhoods and educational areas;
- Adding a Recreational Path along the west side of the roadway;
- Adding fully buffered bike lanes along each side of the roadway for the length of the roadway extension; and
- Installing lighting, artwork and landscaping.

Where can I find more information about the project?

Visit the Project Website at www.imjinparkway.com for News, Traffic Updates, and Project Information.
